Digest of report ................................................................. v
The special study of the options markets staff list .................... XII
Glossary ........................................................................ XV

CHAPTER I—Introduction:
   A. The growth of listed options trading ........................................ 1
   B. Effect of listed options trading on the securities industry .......... 9
   C. Studies of economic effects of listed options trading .......... 12
   D. Summary and conclusions of the options study .................... 18
      1. Self-regulatory organization systems .................................. 19
         (a) Market surveillance .................................................... 19
             (1) American Stock Exchange surveillance information and audit trail . 21
             (2) New York Stock Exchange surveillance information and audit trail . 24
             (3) Firm proprietary and customer trading information .................. 25
             (4) Options clearing corporation position adjustments .............. 26
             (5) The sharing of surveillance information and the allocation of regulatory responsibility . 27
         (6) Investigation and enforcement ........................................ 30
         (b) Broker-dealer oversight ............................................... 33
   2. Trading practices .......................................................... 37
      (a) Professional trading .................................................. 38
      (b) Position limits .......................................................... 40
      (c) Clarification of trading rules ......................................... 42
   3. Selling practices .......................................................... 43
      (a) Customer protection .................................................. 44
          (1) The OCC prospectus ................................................ 44
          (2) Customer suitability ................................................. 47
          (3) Opening account statements ..................................... 50
      (b) Responsibilities of broker-dealer firms ............................. 52
          (1) Qualification of registered representatives ..................... 52
          (2) Supervision of registered representatives and of customer accounts ......... 54
          (3) Recordkeeping and communications with customers .......... 56
          (4) Exercise allocations ................................................. 58
   4. Financial structure ....................................................... 58
      (a) The Commission’s net capital rule ................................... 59
          (1) Increase of deductions in computing net capital ................. 60
          (2) Net capital deductions for marketmaker clearing business .......... 62
          (3) Marketmaker minimum net capital ................................ 63
          (4) Financial requirements of upstairs dealer firms ............... 64
          (5) Marketmakers that are OCC members ................................ 66
      (b) Options specialist stock credit ....................................... 67
          (1) Stock hedge .......................................................... 68
          (2) Limit on stock qualifying for specialist stock credit ............. 71
   5. Market structure .......................................................... 72

(xxvii)
CHAPTER II—Fundamentals of Exchange Traded Options:

A. Characteristics of options

1. Conventional OTC options compared to listed options
2. The options contract
3. Stock price considerations in listed options
4. Short-term character of options trading
5. Transaction costs
6. Options pricing models
7. Examples of the effect of options contracts
   (a) Call option
   (b) Put option
   (c) Gains or losses to options buyers are offset by losses or gains to options sellers

B. Principal strategies

1. Introduction
2. Ten basic strategies
3. Survey of investor use of option strategies
4. Writing options for premiums

Exhibit I: The relationship between puts, calls, straddles and stocks

CHAPTER III—The Use of Options By Professional Traders:

Introduction

1. On floor market participants
   (a) Obligations
   (b) Privileges
   (c) Options trading strategies
   (d) Stock/options trading strategies
2. Upstairs firms
   (a) Advantages enjoyed by upstairs firms
   (b) Arbitrage trading
      (1) Conversion and reverse conversion arbitrage
      (a) Conversion arbitrage
      (b) Reverse conversion arbitrage
      (2) Hedged short selling
      (3) Merger or exchange offer arbitrage
      (4) Discount options arbitrage
   c. Block trading
   d. Creation of synthetic puts
3. Institutional investors
4. Specific trading abuses
   (a) Fictitious trades
   (b) Prearranged trading
   (c) Chumming
   (d) Stock option manipulation
      (1) Minimipulation
      (2) Capping and pegging
      (3) Statutory prohibition of manipulation
      (4) Problems of proof and the need for data
   (e) Front-running
5. Trading rules
   (a) Position limit rules
   (b) Restricted options rules
CHAPTER IV—Self-Regulatory Organization Surveillance of the Standardized Options Markets:

I. Introduction .............................................. 197
II. Methodology ............................................ 201
III. Surveillance information ................................ 203
  1. The sources of surveillance information ............. 208
     (a) Transaction information .......................... 208
     (b) Clearing information .......................... 212
     (c) Account information .......................... 214
  2. The organization of capture of surveillance information...
     (a) Transaction information .......................... 208
     (b) Clearing information .......................... 212
     (c) Account information .......................... 214
  3. Conclusions and recommendations ..................... 219
     a. Surveillance information ......................... 219
        (1) AMEX surveillance information and audit trail .... 220
        (2) NYSE surveillance information and audit trail .... 223
        (3) Stock market reconstruction ..................... 230
        (4) Firm proprietary and customer trading identification .... 233
        (5) Customer account identification .................. 236
        (6) OCC position adjustments ...................... 238
     b. Surveillance techniques ............................ 243
        (1) Surveillance techniques and surveillance information .... 243
        (2) The sharing of surveillance information and the allocation of regulatory responsibility .... 244
        (3) Improving options exchange surveillance techniques ................................ 252
        (4) Uniform reporting requirements .................. 253
IV. Investigation and enforcement .......................... 254
  1. The CBOE and PSE ................................ 255
  2. The PHLX ........................................ 257
  3. The AMEX ........................................ 258
  4. The MSE .......................................... 263

Table 1—Surveillance data Available ................................ 207
Table 2—Comparison of surveillance data available to surveillance data captured .......................... 218

Exhibits:

1. CBOE Market Data Retrieval Listing (MDR):
   A. By Time ........................................ 265
   B. By Price ....................................... 266
2. Amex options daily journal report .......................... 267
3. NYSE daily transaction journal .......................... 269
4. CBOE matched transaction listing (MTL) ..................... 270
5. NYSE daily reconciliation clearing sheets .............. 271
6. OCC daily position report ................................ 273
7. Amex form 958-C .................................... 274
8. PSE form OTR-1 ..................................... 275
Appendix Exhibits*:

1. Trading procedures and trade matching operations of the AMEX, CBOE, MSE, PHLX, PSE, and NYSE; surveillance techniques of the AMEX, CBOE, MSE, PHLX, and PSE.
2. Sample inspection outline and inspection information request (CBOE).
3. CBOE marketmaker minimanipulation and capping investigation (Case No. M 7145).
4. PSE expiration study.
5. CBOE capping investigation (complaint No. M 8018).
6. AMEX capping investigation.
7. AMEX capping investigation.
8. NYSE expiration study.
9. CBOE prearranged trading investigation (complaint No. M 8080).
10. AMEX prearranged trading investigation.
11. CBOE prearranged trading investigation (Case No. M 7052).
12. CBOE fictitious trading investigation (Case No. M 7061).
14. AMEX front-running investigation.
15. PSE front-running investigation.
16. Inside information investigation.
17. AMEX inside information investigation.
18. CBOE position adjustment investigation (complaint No. M 8098).
19. CBOE position adjustment investigation (complaint No. M 7163).
20. Table A: Exchange surveillance parameters.
    Table B: Summary of exchange personnel.
    Table C: Exchange surveillance expenditures.
    Table D: Options exchange cleared contract volume.

CHAPTER V—Options Selling Practices:

Introduction .................................................................................................................. 289
A. Registered representative qualification, preparation and motivation .................................. 296
B. Supervision of accounts ................................................................................................. 314
C. Suitability .................................................................................................................... 336
D. Disclosure documents ................................................................................................. 369
E. Promoting options—general problems ........................................................................ 384
F. Promoting options—specific methods .......................................................................... 402
G. Promoting options—investment programs .................................................................. 425
H. Options trading in customer accounts .......................................................................... 440
I. Exercise problems ....................................................................................................... 477

CHAPTER VI—Self-Regulatory Organization Oversight of Retail Firms and Their Associated Persons:

I. Introduction ................................................................................................................. 487
II. An Overview of SRO compliance programs ............................................................... 492
A. Monitoring programs .................................................................................................... 492
   1. Employment and termination of registered representatives ............................................... 493
   2. Customer complaints .................................................................................................. 494
   3. Advertising ................................................................................................................ 494
   4. Financial responsibility early warning systems .......................................................... 496
   5. Credit monitoring ....................................................................................................... 496
B. Cause examinations .................................................................................................... 497
C. Routine examinations .................................................................................................. 498
D. Disciplinary actions ..................................................................................................... 501

*These Appendix Exhibits are available publicly in the Commission's Public Reference Room and, therefore are not published as a part of this report.
XXXI

CHAPTER VI—Continued

III. Obtaining compliance information .................................................. 502
   A. Public customers ........................................................................ 502
   B. SROs ....................................................................................... 507
      1. Sharing of information ......................................................... 507
      2. Coordination of compliance programs ..................................... 516
   C. Government agencies .................................................................. 518
   D. Retail firms ................................................................................ 520
      1. Accessibility of customer complaints and account information ... 520
      2. Reporting requirements ......................................................... 524

IV. Deficiencies in SRO examinations ...................................................... 530
   A. Limited scope of examinations ................................................... 530
   B. Poor selection of accounts for review ........................................... 537
   C. Inadequate depth of account examinations ..................................... 540
   D. Reliance on firms for assistance .................................................. 544
   E. Failure to resolve disputed issues of fact ....................................... 547
   F. Inadequate resources ................................................................. 549

V. Remedial actions .................................................................................. 550
   A. Extent of disciplinary proceeding ............................................... 551
   B. Use of informal sanctions .......................................................... 554
   C. Reasons for inadequate sanctions—restrictive SRO policies ....... 561
   D. SRO internal supervision ............................................................ 564
   E. Restitution as a sanction ............................................................... 565
   F. SRO disciplinary proceedings: a final note .................................... 566

VI. The need for minimum SRO compliance standards ............................... 567

Table I—Number of options related sales practice (or capital/sales practice) examinations conducted by SROs ............................... 500
Table II—Summary of SRO examination and disciplinary action as to firm XYZ ........................................................................ 509
Table III—Summary of SRO information on selected securities salesmen ........................................................................ 512
Table IV—Selected comparison of complaints reported to NYSE and complaints received by two NYSE member firms in 1977 .................. 525
Table V—Summary of types of options related violations detected by SROs in their 1977 sales practices and capital/sales practice examinations of firms with options commission income in excess of $1,000,000 .................. 539
Table VI—Options related sales practice disciplinary actions brought by the SROs as of March 1978 ..................................................... 553
Table VII—Summary of disciplinary action by an SRO against firm ABC ................................................................................ 555

Exhibits:

Options study questionnaire set to the options exchanges (App. A*).
Options study questionnaire sent to the NYSE (App. B*).
Options study questionnaire sent to the NASD (App. C*).
Summary of SRO options related examinations and investigations of firm DEF for 1973-1978 (App. D) ............................................ 570
Letter to Richard Teberg from the Self-Regulatory Conference (App. E) ...................................................................................... 577
Summary of statistics relating to SRO routine sales practice examinations (App. G) ................................................................. 604
Summary of SRO financial resources (App. H) ........................................ 611

*These appendix exhibits are available publicly in the Commission’s public reference room and, therefore, are not published as a part of this report.

CHAPTER VIII—Continued

III. Multiple trading of standardized options
   A. The effects of multiple trading of standardized options
      1. The effects of multiple trading on the quality of markets for multiply traded option classes
      2. Competition among market centers
   B. Market fragmentation
      1. The extent of market fragmentation for multiply traded option classes
      2. Brokerage firm order routing decisions in the fragmented market environment
      3. Market fragmentation, option pricing, and order interaction
   C. Conclusions
      1. The multiple trading of standardized options and the Exchange Act
      2. The multiple trading experience
      3. Market fragmentation and the Exchange Act
      4. Primary market designations and automated order routing
      5. The multiple trading of standardized options and recent initiatives toward the development of a national market system

IV. The integration of trading of options and their underlying Securities
   A. The general considerations
      1. The quality of markets
      2. The regulatory concerns
         (a) Market information and competitive advantage
         (b) Manipulation and other improper trading practices
         (c) Potential conflicts in marketmaking obligations
         (d) Market surveillance
      3. The extent of integration
      4. Characteristics of the exchange
         (a) Primary and secondary exchanges
         (b) The marketmaking systems
   B. Conclusions
      1. The gradual approach
      2. Principles of general applicability and the statutory standards
      3. The principles applied

V. An over-the-counter market for standardized options
   A. Standardized options and underlying securities traded exclusively in the over-the-counter markets
      1. The absence of real-time last sale reporting for underlying securities traded exclusively in the over-the-counter markets
      2. Representative bid and ask quotations for securities traded in the over-the-counter markets
   B. Trading exchange listed options in the over-the-counter markets
      1. Fragmentation and internalization
      2. Market information and competitive advantages of over-the-counter marketmakers
      3. Over-the-counter markets and a national market system which would include standardized options
   C. The integration of trading of options and their underlying securities in the over-the-counter markets
      1. Market information, competitive advantage and improper trading practices
      2. Marketmaking obligations and commitment to the marketplace
      3. Market surveillance in the over-the-counter markets
CHAPTER VIII—Continued

D. Conclusions

1. Real-time last sale reporting and representative bid and ask quotations

2. An over-the-counter market for options traded on exchanges

3. The integration of trading of options and their underlying securities in the over-the-counter markets

VI. The New York Stock Exchange and standardized options trading

A. The predominant position of the New York Stock Exchange in the markets for underlying securities

1. NYSE market share

2. NYSE financial resources

3. NYSE marketmaking resources

4. Additional NYSE resources

B. Potential NYSE predominance of the standardized options markets

1. NYSE and the primary market designation

2. NYSE facilities advantage

3. NYSE advantage with respect to combined orders

4. NYSE financial resources

5. NYSE marketmaking resources and advantages

6. NYSE ability to attract talent

C. Conclusions

1. The predominant position of the New York Stock Exchange

2. The New York Stock Exchange and the statutory dilemma

3. A cautious approach

VII. A national market system for standardized options

A. Options and the evolving national market system

B. Options and the objectives of a national market system

C. The form of a national market system

1. A comprehensive quotation system

2. Market linkage and order routing systems

3. Nationwide limit order protection

4. Off-board trading restrictions

Table 1—Call option classes which have been listed on two or more options exchanges

Table 2—Summary of price continuity data for call options multiply traded on CBOE and AMEX

Table 3—Summary bid/ask spread data for call options multiply traded on the CBOE and AMEX

Table 4—Total contract volume for call options listed on both AMEX and CBOE
